

mine&make

Startup | Product Innovation | Data Science

The following position is open:

Head of DevOps (m/f/d), focus on NLP

mine&make GmbH, Stuttgart / Germany, Mai 2022

The Company

mine&make is a tech company based in Stuttgart. We develop a AI-powered Product Innovation platform that helps our customers to understand their products' future concretely, to identify new business opportunities for their products, and to redesign them. We are data scientist, product strategist and concept developer. We automate product innovation to make it quicker and more cost-effective.

Further information under:
www.mineandmake.com

We are looking for a full-stack Developer to lead the development operations of our NLP-based Data-Analytics, front-end and back-end.

- Lead mine&make's DevOps-team
- Develop various NLP modules, visualization tools, user interfaces and databases
- Specify the data analytics modules together with our customer project managers
- Collaborate with external partners and supervise students

What we offer:

- The development of the latest data analytics tools
- Ownership of mine&make's data analytics development operations

- Exciting challenges at the interface of data analytics and product innovation
- The building of a tech company
- Open, highly motivated, and very experienced colleagues who live entrepreneurship

What you should bring along:

- Strong knowhow in Natural Language Processing,
- Experience with the NLP resources and their deployment
- Basic understanding of mechanical and electro-technical engineering
- Good understanding of the industrial challenges
- Self-driven, pragmatic, and structured
- Entrepreneurial mindset and ability to represent mine&make

Your Profile:

- Successfully completed studies in computational linguistics or data science with focus on NLP
- Full-stack developer
- Python
- Fluent in spoken and written business English, good German language skills

Organizational:

- Start date: asap
- Workplace in the Impact Hub Stuttgart, Quellenstr. 7a, 70376 Stuttgart
