

# **Software Metrics**

# **Learning Guide – Information for Students**

### 1. Description

Grade	European Master on Software Engineering
Module	Support Processes
Area	
Subject	Software Metrics
Туре	Compulsory
ECTS credits	4
Responsible department	Lenguajes y Sistemas Informáticos e Ingeniería del Software
Major/Section/	

Academic year	2012/2013
Term	1st term
Language	English
Web site	

#### 2. Faculty

NAME and SURNAME	OFFICE	email
Tomas San Feliu (Coord.)	5106	tsanfe@upm.es

### 3. Prior knowledge required to take the subject

Passed subjects	•
Other required learning outcomes	•

### 4. Learning goals

SUBJECT-SPECIFIC COMPETENCES AND PROFICIENCY LEVEL		
Code	Competence	Level
SC10	To evaluate objectively processes and products versus standards and applicable norms	A

Proficiency level: knowledge (K), comprehension (C), application (A), and analysis and synthesis (S)

SUBJECT LEARNING OUTCOMES			
Code	Learning outcome	Related competences	Profi- ciency level
LR1	To be able to lead and implement measurement plans for process and product assessment	SC10	A
LR2	To be able to analyze data for project estimation, planning and quality control in software projects	SC10	A
LR3			

### 5. Subject assessment system

	ACHIEVEMENT INDICATORS		
Ref	Indicator	Related to LR	
11	Software metrics definition developed	LR1	
12	An analysis of a measurement database performed	LR2	
13			

(Optionally, use rubric table instead)

CONTINUOUS ASSESSMENT			
Brief description of assessable activities	Time	Place	Weight in grade
Paper	Week 5	Class	15
Definition Report	Week 9	Class	20
Analysis Report	Week 15	Class	30
Exam	Week 16	Class	25
Class activities	Week 1-13	Class	10

#### **GRADING CRITERIA**

The final evaluation of the students is based on the evaluation of a paper(15%), a measurement definition report exam(20%), an analysis report(30%) and an individual written exam(25%).

Class participation and additional activities in the classroom are performed. These additional activities represent a 10% of the final scoring.

# 6. Contents and learning activities

SPECIFIC CONTENTS		
Unit / Topic / Chapter	Section	Related indicators
Chapter 1:	1.1 Measurement Concepts	11
Introduction to quality control and	1.2 Measurement as a support process	l1
planning needs	1.3 Review Metrics Models and Standards	l1
	2.1 Formulating problem and goal statement	11
Chapter 2: Measurement goals	2.2 Prioritize information needs and objectives	11
	2.3 Formalize measurement goals	11
	Identify questions and indicators	I1, I2
Chapter 3: Specify Measures	Identify data elements	l1
	Operational definitions for measures	11,12
Chapter 4: Specify	Sources of data	I1, I2
Data Collection and Storage Procedures	Specify how to collect and store the measurement data	11,12
Chapter 5: Specify Analysis Procedures	Potential data analyses	12
	Methods and tools	12
Chapter 6:	Develop a Reporting	12
Communicate Results	Contextual information	12

# 7. Brief description of organizational modalities and teaching methods

TEACHING ORGANIZATION		
Scenario	Organizational Modality	Purpose
X	Theory Classes	Talk to students
	Seminars/Workshops	Construct knowledge through student interaction and activity
	Practical Classes	Show students what to do
	Placements	Round out student training in a professional setting
x	Personal Tutoring	Give students personalized attention
x	Group Work	Get students to learn from each other
X	Independent Work	Develop self-learning ability

		IODS	
	Method	Purpose	
x	Explanation/Lecture	Transfer information and activate student cognitive processes	Known as explanation, this teaching method involves the "presentation of a logically structured topic with the aim of providing information organized according to criteria suited for the purpose". This methodology, also known as <i>lecture</i> , mainly focuses on the verbal exposition by the teacher of contents on the subject under study. The term <i>master class</i> is often used to refer to a special type of lecture taught by a professor on special occasions
	Case Studies	Learning by analyzing real or simulated case studies	Intensive and exhaustive analysis of a real fact, problem or event for the purpose of understanding, interpreting or solving the problem, generating hypotheses, comparing data, thinking, learning or diagnosis and, sometimes, training in possible alternative problem-solving procedures.
	Exercises and Problem Solving	Exercise, test and practice prior knowledge	Situations where students are asked to develop the suitable or correct solutions by exercising routines, applying formulae or running algorithms, applying information processing procedures and interpreting the results. It is often used to supplement lectures.
	Problem-Based Learning (PBL)	Develop active learning through problem solving	Teaching and learning method whose starting point is a problem, designed by the teacher, that the student has to solve to develop a number of previously defined competences.
	Project-Oriented Learning (POL)	Complete a problem- solving project applying acquired skills and knowledge	Teaching and learning method where have a set time to develop a project to solve a problem or perform a task by planning, designing and completing a series of activities. The whole thing is based on developing and applying what they have learned and making effective use of resources.
X	Cooperative Learning	Develop active and meaningful learning through cooperation	Interactive approach to the organization of classroom work where students are responsible for their own and their peers' learning as part of a co-responsibility strategy for achieving group goals and incentives. This is both one of a number of methods for use and an overall teaching approach, or philosophy.
	Learning Contract	Develop independent learning	An agreement between the teacher and student on the achievement of learning outcomes through an independent work proposal, supervised by the teacher, and to be accomplished within a set period. The essential points of a learning contract are that it is a written agreement, stating required work and reward, requiring personal involvement and having a time frame for accomplishment.

BRIEF DESCRIPTION OF THE ORGANIZATIONAL MODALITIES AND TEACHING METHODS		
THEORY CLASSES	During a theory class, teacher explains verbally the contents of the chapter. In this way, he provides students basic information from different sources.	
PROBLEM-SOLVING CLASSES		
PRACTICAL WORK		
INDIVIDUAL WORK	Student will learn to work individually in order to prepare oral presentations and written documents. In this method, the student will have to collect information from internet and the bibliography	
GROUP WORK	This work is complementary to the individual work. The objective is to encourage the cooperative learning, in order to divide the research work, the written document and the oral presentation, and put all of it together.	
PERSONAL TUTORING	Students could ask, individually or in groups, for tutoring sessions in order to solve of the issues they have.	

### 8. Teaching resources

RECOMMENDED READING	Stephen H. Kan, Metrics and Models in Software Quality Engineering, Addison Wesley, 2003					
	Anita Carleton, William A. Florac, Measuring the Software Process, Addison-Wesley 1999					
	Chris Chen and Hadley Roth, The big book of Six Sigma training games, McGraw-Hill, 2005					
WEB RESOURCES	Subject web site (http://www.sei.cmu.edu/measurement/)					
	Subject Moodle site (http://)					
EQUIPMENT	Laboratory					
	Room XXXX					
	Group work room					

### 9. Subject schedule

Week	Classroom activities	Lab activities	Individual work	Group work	Assessment activities	Others
Week 1 (3 hours)	Chapter 1(2 hours)	• (hours)	<ul> <li>Individual study(1 hours)</li> </ul>	• (hours)	•	•
Week 2 (4 hours)	Chapter 2(2 hours)	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	• (hours)	•	•
Week 3 (7 hours)	Chapter 2(2 hours)	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	<ul> <li>Research work (3 hours)</li> </ul>	•	•
Week 4 (7 hours)	Chapter 2(2 hours)	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	<ul> <li>Research work (3 hours)</li> </ul>	•	•
Week 5 (4 hours)	•	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	<ul> <li>Research work(3 hours)</li> </ul>	<ul> <li>Paper presentation(1 hour)</li> </ul>	•
Week 6 (8hours)	Chapter 3(2 hours)	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	<ul> <li>Research work(4 hours)</li> </ul>	•	•
Week 7 (8hours)	Chapter 3(2 hours)	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	<ul> <li>Research work(4 hours)</li> </ul>	•	•
Week 8 (8hours)	Chapter 3(2 hours)	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	<ul> <li>Research work(4 hours)</li> </ul>	•	•

Week 9 (8hours)	•	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	<ul> <li>Research work(5 hours)</li> </ul>	<ul> <li>Definition report(1hour)</li> </ul>	•
Week 10 (8hours)	Chapter 4(2 hours)	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	<ul> <li>Research work(4 hours)</li> </ul>	•	•
Week 11 (8hours)	Chapter 5(2 hours)	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	<ul> <li>Research work(4 hours)</li> </ul>	•	•
Week 12 (8hours)	Chapter 5(2 hours)	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	<ul> <li>Research work(4 hours)</li> </ul>	•	•
Week 13 (8hours)	Chapter 6(2 hours)	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	<ul> <li>Research work(4 hours)</li> </ul>	•	•
Week 14 (6hours)	•	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	<ul> <li>Research work(4 hours)</li> </ul>	•	•
Week 15 (6 hours)	•	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	Research work(2 hours)	Analysis Report (2hour)	•
Week 16 (3 hours)	Final Test	• (hours)	<ul> <li>Individual study(2 hours)</li> </ul>	• (hours)	• Final Test(1hours)	•

Note: Student workload specified for each activity in hours
